New Trends in Radio Astronomy in the ALMA Era

The 30th Anniversary of Nobeyama Radio Observatory

Hakone, Japan
December 3(Mon)—8(Sat), 2012

http://www.nro.nao.ac.jp/~nro30/

Scientific Organizing Committee
- Cernicharo, J. (INTA-CSIC)
- Combes, F. (Paris)
- Dutrey, A. (Bordeaux)
- Hayashi, M. (Tokyo)
- Ho, P. T. P. (ASIAA)
- Inutsuka, S. (Nagoya)
- Kawabe, R. (NAOJ)
- Komatsu, E. (Texas)
- Lo, F. K. Y. (NRAO)
- Scoville, N. (Caltech)
- van Dishoeck, E. F. (Leiden)
- Yamamoto, S. (Tokyo) (Chair)

Scope
This is an international symposium celebrating the 30th anniversary of Nobeyama Radio Observatory (NRO) of National Astronomical Observatory of Japan (NAOJ), which was established in 1982. The scope of the symposium is as follows:

1. Recent progress of radio astronomical observations, including first outcomes from the ALMA early science, in cosmology, galaxies, star and planet formation, evolved stars, the solar system, interstellar matter, and other fields.
2. Related observations in the other wavelengths and theoretical studies.
3. Ongoing and future radio astronomy projects which are complimentary to ALMA, as well as the next international projects after ALMA.

Local Organizing Committee
- NRO: Isono, D., Kuno, N. (Vice chair)
- NAOJ: Saito, M., Sekiguchi, K.
- UTokyo: Kohno, K. (Chair), Sakai, N., Tamura, Y.
